ME

## Borgo Incantato © Il Paradiso degli Animali

 NÙOur mission, in respect of the protection and safeguarding of animals, is that we only use meat from local agricultural services and do not provide intensive care, supporting as well the sustainable economy at km0.

Aware of living in a world where over $90 \%$ of the civilized population consumes a diet composed mainly of animal proteins, while not excluding the offer of meat, we try every day to include vegetarian and vegan dishes on our menus, the result of a painstaking research by our Chefs and the support of our garden, for the benefit of a balanced diet that respects the ecosystem.

Choosing a vegetarian dish at Borgo Incantato, among the various options on our seasonal menus, means appreciating the attention, care, research and constant passion we put into the preparation of the dishes.

Trying our vegetarian options means being surprised by harmonious flavours, which speak of everything that Mother Earth can offer us.

We are certain that you will find a dish that will delight your palate and will make you love the Enchanted Village also for this new experience...
